

Bulkbag carrier | MBBH | 2.000 kg

- The Bulkbag carrier is a robust lifting equalizer specially designed for efficient and safe lifting of bulk bags, especially for construction material bags.
- Suitable for various applications, including transporting, collecting and storing construction waste, sand, bricks, gravel and other debris. Ideal for situations where materials are too heavy to transport by hand.
- The bulkbag carrier is equipped with raised MYX latch hooks at all four ends, making it easy to hook up the sand bags safely and securely. This ensures fast and reliable attachment. Because of the raised hooks it can be used where you have limited lifting height.
- Built with durable materials and solid construction to withstand long-term use and heavy loads. The lifting equalizer is designed with quality and reliability in mind.
- When installed, maintained and used, in accordance with the operating instructions and the rules of good workmanship, complies with the basic health and safety requirements of the European Machinery Directive: EU Machine Directive 2006/42 /EC Annex II, 1A
