VERTEX® HI-VIZ

The VERTEX helmet is very comfortable, with a six-point textile suspension as well as CENTERFIT and FLIP&FIT systems, which provide a secure fit on the head. The adjustable-strength chinstrap makes it ideal for both work at height and on the ground. The unventilated outer shell protects against electrical hazards and flames. With the ability to integrate a Petzl headlamp, face shield, hearing protection, and multiple accessories, it is an entirely modular helmet, meeting the additional needs of professionals. The high-visibility version features a fluorescent outer shell with phosphorescent clips and reflective bands for optimal visibility of the worker, day or night.

The helmet features a fluorescent outer shell with phosphorescent clips and reflective bands, providing optimal visibility of the worker, day or night.

The six-point webbing suspension system adapts to the shape of the head to provide maximum comfort.

The clip of the DUAL chinstrap allows the worker to adjust chinstrap strength in order to adapt the helmet to different environments: work at height (EN 12492) or on the ground (EN 397).

Short Description	Comfortable high-visibility helmet
Selling Points	• Very comfortable: - Six-point textile suspension adapts perfectly to the shape of the head - CENTERFIT feature allows you to center the helmet on the head using the two side adjustment wheels - FLIP&FIT system allows the headband to be positioned low on the head and offers a secure fit; the system folds into the shell for easy storage and transport - Comes with interchangeable standard comfort foam • Protection designed for work at height and on the ground, day or night: - DUAL chinstrap allows the worker to adjust chinstrap strength in order to adapt the helmet to different environments: work at height (EN 12492) or on the ground (EN 397). The clip has two positions corresponding to two different uses: high strength to limit the risk of losing the helmet during a fall, and low strength to limit the risk of strangulation if the helmet is snagged while the user is on the ground. - Shock absorption is achieved through deformation of the outer shell - Unventilated outer shell protects against electrical hazards and flames - Fluorescent outer shell with phosphorescent clips and reflective bands provides optimal visibility of the worker, day or night • Modular accessories: - Eye shield with EASYCLIP side attachment system for easy installation - Petzl headlamp using mounts, or other headlamp using the elastic headband - Helmet protector keeps the shell free from soiling and paint splash - Nape protector provides effective sun and rain protection for the nape of the neck - Nametag holder allows user to be easily identified - Interchangeable chinstrap and foam - Hearing protection - Available in two high-visibility colors: yellow and orange
Specification	• Head circumference: 53-63cm • Weight: 495g • Material(s): ABS (acrylonitrile butadiene styrene), nylon, polycarbonate, high-density polyester, polyethylene • Certification(s): CE, EN 397, EN 12492 (1), EN 50365, conforme à la norme ANSI Z89.1 Type I Class E, EAC, AS/NZS 1801, GB 2811-2019 • (1) Meets all requirements of the EN 12492 standard, except the ventilation requirement.
